

Beauty Product Sales Dashboard 2025 - Business Insights Report

Executive Summary

- Total Sales: 263.81K (31.9% above target of 200K).
- Total Profit: 53.49K (18.9% above target of 45K).
- Profit Margin: 20% (well above target margin of 12%).

Key Product Insights

- Sunscreen is the highest-selling product (~26K sales), indicating strong customer demand.
- Perfume and Mascara are also major contributors to revenue.
- Product mix appears diversified, reducing dependence on a single product category.
- The sales distribution chart shows Shampoo as one of the largest contributors to total sales share.

Monthly Trend Analysis

- Sales peak in August (~40K), suggesting strong seasonal demand or successful promotions.
- March, June, and November also show strong performance.
- January, July, October, and December are relatively weaker months.
- Revenue fluctuations indicate the need for targeted campaigns during low-performing periods.

Regional Performance

- North region generates the highest profit (~19K).
- South follows with ~13K profit.
- West and East contribute lower profits (~11K and ~10K).
- Regional performance gap suggests expansion opportunities in East and West.

Business Interpretation

- High sales and high profit margin indicate healthy pricing and cost control.
- North region likely benefits from stronger demand, better distribution, or higher-value customers.
- August sales spike may be linked to seasonal buying behavior, festive periods, or marketing campaigns.
- Lower-performing months indicate unused revenue potential.

Potential Findings for Internship Presentation

- Products with high sales but average profit should be reviewed for margin optimization.
- Best-selling products should receive higher inventory allocation to prevent stock-outs.
- Underperforming regions require focused marketing and distribution efforts.
- Seasonal sales patterns should be incorporated into future forecasting models.

Recommendations

1. Increase marketing spend before August and other peak months to maximize returns.
2. Run promotional campaigns during January, July, October, and December to improve demand.
3. Expand successful North-region strategies to East and West regions.
4. Introduce bundle offers combining high-demand and lower-demand products.
5. Track product-level profit margins to identify products with strong sales but weak profitability.
6. Use customer segmentation and regional targeting for more efficient advertising.
7. Maintain profit margin above 20% while scaling sales volume.

Conclusion

The dashboard reflects strong overall business performance with sales, profit, and profit margin exceeding targets. Future growth should focus on regional optimization, seasonal planning, and improving profitability across the product portfolio.
